ACCESSING ONLINE RESOURCES IN IIUM LIBRARY

The IIUM Library subscribes to nearly 55 online databases that allow library users to look up information online. The online databases provide abstracts, articles, theses, acts, cases, full text access, etc. that covers almost all subjects.

Who has access to the Library's online resources?

In the IIUM Library and within IIUM Campus (including branches) - All users at public workstations.

Outside IIUM Campus (including branches) - Only staff and students of IIUM who register to the Digital Library Services.

What is off-campus?

Accessing databases through the library website requires authentication information such as username, ID number, or PIN; while the person is away from the campus or using a different network provider such as broadband.

How do I achieve remote access?

Setup Off-Campus Proxy Access once for first time user or if you change your computer's web browser.

Make sure you are registered with the Library's Digital Library Services.

Click any desired online database. You will be prompted with a Proxy Authentication Login Form. Log in using your username and PIN. You will immediately be connected to the selected database.

How to access?

If you are on-campus with an IIUM IP Address (using IIUM network or wireless), you can go directly to the resources and get right in since the online databases' publishers will recognize your IIUM IP address or you can access through the online databases list at the library website, http://www.lib.iium.edu.my.

If you are off-campus with a non-IIUM IP address you will need to setup the Off-Campus Proxy Access and will be routed through the library's proxy server, which will bring you to the Digital Library Services. This is where you must supply your username and password registered at the Digital Library Services to get access.

Face any problems?

If you have problems using off-campus access, kindly contact your liaison librarian. Full documentation and user manual is available at: http://lib.iium.edu.my/index.jsp?module=ROOT&action=proxy_guide.jsp

Online Database of the Month

Highlights on Academic Source Premier

Academic Source Premier (ASP) is a scholarly, multidisciplinary, full text database designed specifically for academic institutions. It has indexing and abstracts for more than 8300 journals, with full text for more than 4,600 of titles covered in the subjects of sciences, humanities and social sciences.

ASP offers critical information from many sources found in no other database. With superb content, easy to use and a number of special features, ASP can be a lifesaver for a good academic research!

News Alert

Relocation of Collections:

The Reference Collection, currently situated on level 2 of the Main Library, is being shifted to level 2 to 4 according to call numbers:

i. Call no. A-C: Level 2
ii. Call no. D-J: Level 3
iii. Call no. L-Z: Level 4

Please visit the correct floors for your subject-based dictionaries, encyclopedias, handbooks, etc.

The Theses Collection (printed) is now moved from the Circulation Counter, level 2 to the Multimedia & Special Collections Counter on level 3. Those who would
